

Date	Version	Group	Description
17.10.2019	2018.3.7	Added functionality	Now you can set a beta check in the settings of can3D.
04.09.2019	2018.3.5	Added functionality	HD camera zoom on Profi 3+ is now possible with the right joystick
29.01.2019	2018.2.103	Added functionality	A can3D [®] license can be assigned to several clouds. When starting the software it is decided which cloud will be used.
20.12.2018	2018.2.96	Added functionality	The video can be displayed in an own window
20.12.2018	2018.2.96	Added functionality	The coordinate system Lambert 93 for France is now available
27.11.2018	2018.2.92	Added functionality	If the camera is inactive for five minutes, a message shows up that the camera will be switched off in 30 seconds
27.11.2018	2018.2.92	Added functionality	EASY HD projects can be imported
27.11.2018	2018.2.92	Added functionality	Projects can be archived
27.11.2018	2018.2.92	Added functionality	Relevant for German version only
30.10.2018	2018.2.90	Added functionality	In the window Edit site directly successive bends can now be clicked more easily and can alternatively be selected via the list
30.10.2018	2018.2.88	Added functionality	Relevant for German version only
30.10.2018	2018.2.88	Added functionality	Images of the site can individually be hidden and shown (effective for the map printout and the report project photos)
05.09.2018	2018.2.79	Added functionality	Email signature for the online viewer is stored in the cloud so it only needs to be specified once.
31.08.2018	2018.2.79	Added functionality	can3D Update can be copied to a USB stick for devices without an online connection.
27.08.2018	2018.2.78	Added functionality	CH - Interlis2 Export
16.08.2018	2018.2.75	Added functionality	Videoup & download through the cloud is done automatically during export. Activation is in the setup.
14.08.2018	2018.2.75	Added functionality	3D camera light cone points in the same direction as the arrow for AutoPilot.
14.08.2018	2018.2.75	Added functionality	Function "Crossing a branch in the ongoing pipe" is now also possible for HD cameras.
06.08.2018	2018.2.73	Added functionality	In AutoPilot mode, the direction arrow should not be displayed when downspout mode is active.
06.08.2018	2018.2.73	Added functionality	Downspout mode in 3D-PipeOverlay.
27.07.2018	2018.2.72	Added functionality	CH - Interlis2 Import
02.08.2018	2018.2.72	Added functionality	The existing pipe should not be overwritten when the pipe is inspected again. Corresponding options can be selected.
01.08.2018	2018.2.71	Added functionality	Image screen is also used with the CamFlex HD in AutoPilot mode.
26.07.2018	2018.2.71	Added functionality	Automatic gradient measurement is now also possible for multiple inspections. Can be individually selected or deselected.
02.08.2018	2018.2.71	Added functionality	New Info video about v2018.2.71 in the start wizard of can3D.
29.06.2018	2018.2.71	Added functionality	Online Viewer. Upload the videos and send a link to the client.
24.07.2018	2018.2.71	Added functionality	Mode change for the CamFlex: Automatic measurement can be switched off; N mode is controlled by image touch; yellow circle is gone again,...)

Date	Version	Group	Description
05.07.2018	2018.2.71	Added functionality	The material of the connection points is shown in the manhole connection report.
16.07.2018	2018.2.71	Added functionality	Option to overwrite the encoding system when exporting the M150.XML (HI005).
19.07.2018	2018.2.71	Added functionality	Several videos can be displayed in the start wizard.
21.07.2018	2018.2.71	Added functionality	Process flow for booking additional dongles for online services extended.
24.07.2018	2018.2.71	Added functionality	An option at the beginning of the inspection added, not to change the existing geometry.
25.07.2018	2018.2.71	Added functionality	Setting the visibility according to the damage classes in the observation report.
23.06.2018	2018.2.70	Added functionality	Recording is paused while focusing HD camera by clicking on live image.
19.06.2018	2018.2.69	Added functionality	Import of measured objects revised.
18.06.2018	2018.2.69	Added functionality	Authorization for the can3DView export can be assigned per device.
15.06.2018	2018.2.69	Added functionality	K60-HD laser measurement adapted.
13.06.2018	2018.2.67	Added functionality	To highlight the active line in the 3D view, all other objects are displayed in grey.
07.06.2018	2018.2.66	Added functionality	Autopilot optimized for automatic gradient measurement. Further optimizations will follow continuously.
01.06.2018	2018.2.66	Added functionality	Online projects can no longer be opened by via REMOVABLE DISK!
30.05.2018	2018.2.66	Added functionality	In Import manager, the vidoes have the option to be deleted after import.
30.05.2018	2018.2.66	Added functionality	Photo-function for bends in automatic measurement.
25.05.2018	2018.2.64	Added functionality	General photos of the schacht are loaded into the cloud.
17.05.2018	2018.2.62	Added functionality	Import of CompactPlusHD projects possible.
15.05.2018	2018.2.61	Added functionality	Code designations on Profi possible.
13.05.2018	2018.2.60	Added functionality	Info-Video with the new features will appear at the start of can3D.
13.05.2018	2018.2.60	Added functionality	Continuous measurement of the HD cameras is optimized.
04.05.2018	2018.2.57	Added functionality	When a bend is detected from approx. 75 °, a selection list is suggested to generate several bends from it.
04.05.2018	2018.2.57	Added functionality	Dividing the measured angles into multiple bends (with HD cameras).
18.04.2018	2018.2.55	Added functionality	Zoom position updated when the K-50 HD pans.
19.04.2018	2018.2.55	Added functionality	Various functions for the motor reel.
24.04.2018	2018.2.55	Added functionality	Camera image stabilizator for HD cameras helps lo locate the run of the pipe.
10.04.2018	2018.2.53	Added functionality	CH: Swiss Projection Systems CH1903/LV03 and CH1903 +-LV95 are supported.
05.04.2018	2018.2.52	Added functionality	Pipe rotates in many down pipes when the down pipe is not at the start.

Date	Version	Group	Description
22.03.2018	2018.2.51	Added functionality	Interface SVC1 (VTG2540-1-Rico) implemented by PS hard-& Software GmbH.
21.03.2018	2018.2.50	Added functionality	Find and replace at online projects activated.
21.03.2018	2018.2.50	Added functionality	Deleted items in online projects can be re-activated.
13.03.2018	2018.2.48	Added functionality	A0 plan-print-out is possible again. Please note restrictions on your PC if necessary.
09.03.2018	2018.2.47	Added functionality	Individual name placing implemented for the export of the city dates.
22.02.2018	2018.2.46	Added functionality	Translation language keys have been laid in for the new terms.
